Abstract (Basic): WO 200227418 A2

NOVELTY - The model treats system faults as noise in a communications channel. Parameters in the model are derived from the system's signals, causing the model to mimic the real system. System diagnosis can then be carried out by observing the model.

USE - For a mechanical, chemical, electrical or electronic system.

ADVANTAGE - Provides accurate diagnostics and prognostics without the need to take the system out of service.

DESCRIPTION OF DRAWING(S) - The figure illustrates the simplified block diagram for the model in accordance with the invention.

Shannon-Weaver model (10)

Information source (12)

Noise source (18)

Destination (22)
